

# DAINYL CUA

## Developer Educator | Full Stack Developer | Technical Writer

Fort Worth, TX | [dainylcua@gmail.com](mailto:dainylcua@gmail.com) | <https://dainylcua.netlify.app/> | [LinkedIn.com/dainylcua](https://www.linkedin.com/dainylcua) | [GitHub.com/dainylcua](https://github.com/dainylcua)

I am a diligent and coachable technical writer and full stack developer with experience in multiple technology stacks and coding languages. Coding logic has always made sense to me due to its problem-solving nature and real-time feedback. I enjoy writing accessible technical content and educating others. I seek to join a welcoming company with a healthy culture.

---

### SKILLS

#### Coding Languages

JavaScript, TypeScript  
Python  
HTML5, CSS  
GraphQL  
Rust

#### Frameworks / Libraries

React, Next.js  
Express.js  
SolidJS  
Django  
Flask

#### Technologies

Azure, Contentful CMS  
Git, GitHub  
MongoDB, PostgreSQL, Firebase  
Node.js  
Heroku, Netlify, Vercel

### PROJECTS

[Twilio Projects](#) (JavaScript, Rust): Multiple projects built and articles written utilizing JavaScript, Rust, and Twilio's many APIs. Many other articles were reviewed on both a grammatical and technical level for other languages.

[DC Blog](#) (Next.js, GraphQL, Contentful, Vercel): A Jamstack blog site built within 48 hours for a hackathon.

[dispbeast.io](#) (MongoDB, Express.js, React, Node.js, Heroku): A MERN stack e-commerce game-application developed in React. Users start with a set amount of money and randomly generated stats; they can find randomly generated items that can be sold to and bought from other users on the marketplace.

[Dev-to-Dev](#) (Python, Django, PostgreSQL, Heroku): A full-stack forum application developed in Django with a group. Dev-to-Dev helps coding bootcamp students and junior devs connect to discuss many topics in the tech field.

### EXPERIENCE

#### Software Engineering Intern for Technical Content

Twilio

Remote (Online)

05/22 – 08/22

- **Technical Expertise:** Learned multiple of Twilio's many APIs and created six projects using various coding languages, frameworks, and technologies.
- **Technical Writing:** Wrote six technical tutorials and reviewed others' tutorials that aimed to educate, inspire, and inform readers on how to integrate Twilio's products with their own technology.

#### Software Engineering Intern

Daniel JS Digital Solutions

Fort Worth, TX (Hybrid)

12/21 – 05/22

- **Technical Expertise:** Learned cutting-edge technologies and implemented them into an educational website with dozens of users.
- **Problem Solving:** Added new features onto an existing website while solving problems in previous iterations.

#### Software Engineering Fellow

General Assembly

Remote (Online)

09/21 – 12/21

- **Technical Expertise:** Engaged in a full-time course while developing dozens of apps using full-stack web development tools in multiple coding languages with multiple libraries and frameworks.
- **Group Collaboration:** Collaborated with multiple developers daily, assisted in code debugging and problem-solving. Managed group GitHub operations for the final major project.
